

Modular Cabinet

DJ-MC

Modular Cabinet is a wall mount type or floor standing cabinet. This design is very easy for install switch and low voltage power distribution equipment in commercial and industrial area. Due to the modularization and simplification, Modular Cabinet have obvious advantage on the installation and wiring, such as fast installation, perfect function, easy operation and save time.

DJ-MB

All the function structure modular is installed in the back of panels. The design of Module Cabinet is approved to direct installation and connects the wiring of functional unit in panel, you can also connect equipment, terminal and busbar system in various direction. Top panel, side panels and cover are all available be installed at site. It is very convenient.

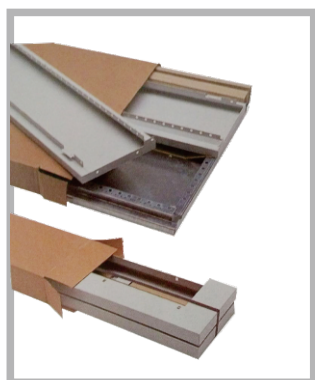

Modular Cabinet constructed from galvanized steel and powder coated RAL7035. two type of frame width 600mm or 900 mm, six height available from 545mm to 1295mm, with 150mm as a increment. With few screws install components in a section room, save space and save time.

DJ-MB

The 900mm width of frame with cable and busbar room, all parts are installed on the mounting plate. The busbar room can be chosen in the left or right side when installing the frame. Shield cover and door are constructed from 1mm galvanized steel with powder coated RAL7035.

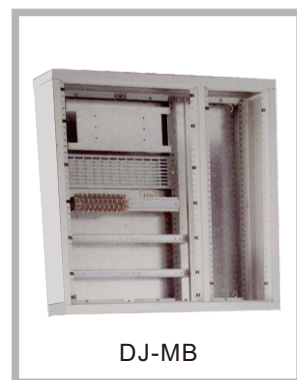

Modular installed components save space for store and transportation.

1.5mm galvanized mounting plate with many of 8mm dia holes, each two holes are 25mm distant. Galvanized steel are very good quality with excellent grounding performance.

Unique groove design makes installed side panel to back panel without using screw & nut.

DJ-MB

Busbar and cable compartment can be installed to the left or right of cabinet.

DJ-MC

Removable cover with 27 ways cutout each row, easy and directly install cover to the side panel.
