

Multimedia Enclosure

Structured Media Enclosures

1 These versatile enclosures allow you to manage and distribute a full range of voice, data networking, audio, and video wiring from one central location. We have enclosure solutions for every construction type: wood, steel frame, concrete, and cinder block construction, and an RF Transparent Enclosure for expanding the reach of a wireless network.

Data Patching and Distribution

2 Dagin offers durable Cat 6 and 5e panels and modules for data cable distribution. The high-end Twist & Mount Panel makes installation simple and provides easy access for moves, additions, or changes in the home network.

Telephone Patching and Distribution

3 Choose from a wide selection of telephone distribution boards, modules, or panels for telephone and security systems. Our Telephone Input Distribution Panel (TIDP) supports inputs for use with triple-play modems and complements the look and simplicity of our Twist & Mount Patch Panels.

Premium and Passive CATV Splitters

4 Distribute the incoming RF signal to locations throughout a home via coaxial cable using Leviton passive CATV splitters, or use Premium splitters to optimize the performance of digital cable signals to handle HDTV.

Wireless Routers and Switches

5 Dagin offers a complete Gigabit solution with high-speed routers and switches. Create a Local Area Network (LAN) in the home or office to network PCs, printers, and other connected devices. Integrate with the Dagin Wireless Router for maximum speeds on wired and portable devices.

Ultra High-Flex Patch Cords

6 Ultra High-Flex Patch Cords allow for tighter radius connections and a cleaner finished appearance inside a dressed Structured Media Enclosure.

ISP Modem (provided by Service Provider)

7 The modem converts DSL, cable, or fiber optic signals for Internet access for triple play service or pure data connections.

Integrated Power Supply >

8 Structured cabling systems rely on active gear that requires low-voltage power and surge protection. Leviton offers power supplies with extra plugs that eliminate the need for bulky power adapters within enclosures.

Dagin Media enclosures provide a convenient termination location for wiring home runs from wall outlets, creating a distribution point for voice, data, audio, and video applications. Available in compact, 14", 21", 28", 30", and 42" sizes to address a broad range of capacities for single family homes, MDUs, and light commercial applications, Dagin Structured Media enclosures support new and retrofit installations.
